### Green initiatives 2022 - 2023

#### Maintenance of existing medicinal plants

Our campus has quite a lot of medicinal plants that were collected as part of green initiatives that we carried out in our college campus. These medicinal plants are nurtured by our students daily to ensure that the plants are healthy and the bear fruits. There are plants that we consistently use as first aid for our students, in case of any minor abrasions or wounds. This has created a psychological impact among students and lead them to maintaining and nurturing the plants.

#### Waste segregation enforcement

We have a team of students to create awareness on proper waste segregation. They have framed a set of rules pertaining to waste segregation and have circulated the rules to the entire students and staff in the college. They also monitor and enforce the rules to ensure proper segregation is happening. Through this enforcement and monitoring, now we are efficiently segregating the waste.

#### Energy and Water conservation awareness

St Annes college students and a Bangalore wide movement is built with an intent to train and sensitize the students and general public on the importance of energy & resource conservation to combat climate change. It imparts knowledge and understanding of natural resources and energy conservation to the young minds. This awareness is an on-going process where in greater number of students are involved in creating the awareness among the students and common public. This has created a tremendous amount of impact among the students, in terms of gaining the necessary knowledge and practically applying that.
