Subject **Fault Loop Impedance Test Failure at site**

, for elevator commission no:

Annes Degree College

25231917

Dear Sir/Madam,

We wish to inform you that subject mentioned elevator has been commissioned. As part of code requirements, we conducted Fault Loop Impedance Test on *29/9/2022* regret to inform that the test has failed. This is attributed to inadequate earthing on site till elevator mains connection in controller in machine room ~~top floor~~ (strike out whichever is not applicable). The concern was brought to your notice earlier, vide letter dated *27/9/2022* and it was strongly recommended to you to rectify this immediately, however unfortunately the earthing issue is not yet fixed.

Inadequate earthing can lead to unsafe condition for user and/or equipment. Hence request you to rectify the earthing arrangement within 1 week, such that the fault loop impedance shall be sufficiently lower, to enable automatic disconnection of overcurrent protective device during a fault. Once you confirm, we can reconduct the test.

Schindler cannot be held responsible for any incident / claim / damage / contingency arising out of non-compliance of this requirement.

Yours Sincerely,
Schindler India Pvt. Ltd.
