World suicide prevention day

World Suicide Prevention Day (WSPD) is an awareness day always observed on 10 September every year, in order to provide worldwide commitment and action to prevent suicides, with various activities around the world since 2003.

"Creating Hope Through Action"

Suicide is a major public health problem with far-reaching social, emotional and economic consequences. "Creating Hope Through Action" is the triennial theme for the World Suicide Prevention Day from 2021-2023. This theme serves as a powerful call to action and reminder that there is an alternative to suicide and that through our actions we can encourage hope and strengthen prevention. World Suicide Prevention Day (WSPD) was established in 2003 by the International Association for Suicide Prevention in conjunction with the World Health Organization (WHO). The 10 September each year aims to focus attention on the issue, reduces stigma and raises awareness among organizations, governments, and the public, giving a singular message that suicides are preventable.

World Mental Health Day

World Mental Health Day 2023 is an opportunity for people and communities to unite behind the theme '**Mental health is a universal human right**' to improve knowledge, raise awareness and drive actions that promote and protect everyone's mental health as a universal human right.

Good mental health is vital to our overall health and well-being. Having a mental health condition should never be a reason to deprive a person of their human rights or to exclude them from decisions about their own health. Yet all over the world, people with mental health conditions continue to experience a wide range of human rights violations. WHO continues to work with its partners to ensure mental health is valued, promoted, and protected, and that urgent action is taken so that everyone can exercise their human rights and access the quality mental health care they need.

Report

World Disability Day, also known as the International Day of Persons with Disabilities (IDPD), is observed on December 3 every year. The day was proclaimed in 1992 by the United Nations General Assembly to promote the rights and well-being of persons with disabilities in all spheres of society and development. It also aims to increase awareness of the situation of persons with disabilities in every aspect of political, social, economic, and cultural life.

The theme for World Disability Day 2023 was "United in action to serve one another" but each year the day focuses on a specific theme to address key issues affecting the disabled community. Themes in recent years have revolved around inclusion, accessibility, and the empowerment of people with disabilities.

The students of St. Anne's Degree College, Halasuru celebrated World Disability Day on December 15th 2023. There was an awareness program organized by the Department of Rehabilitation Science. The students of the department along with Ms. Shobha, HOD and Ms. Danila organized a short program that includes badging ceremony, mime and facts to create awareness and explain about the significance of December 3rd. It was followed by a short message regarding the disability.

Nandini milk dairy produces up to 1-4 lakhs of units milk per day. Overall there are 1000 employees in this factory. They undergo various stages in this milk production. They not only produce milk but also other products like butter milk, ghee, lassi, buter, and various sweets. They also have different lab testing rooms for each products to ensure hygiene production.

We were asked to observe the various stages that were involved in milk production like:

- **Pasteurization:** Milk undergoes pasteurization, a heat treatment process that kills harmful bacteria while retaining essential nutrients.
- **Homogenization:** This process breaks down fat molecules to ensure even distribution throughout the milk, enhancing texture and taste.
- **Standardization:** Adjusting the fat content in milk to meet regulatory standards and consumer preferences.

This observation also included different methods involved in storing the milk.

- **Collection Centres:** The factory sources milk from various collection centres, ensuring fair trade practices and timely payments to farmers.
- **Storage Tanks:** Upon arrival, milk is stored in large, temperature-controlled tanks to maintain its freshness.

Testing and maintenance:

- **Laboratory Testing:** Regular sampling and testing of milk to check for contaminants and ensure compliance with quality standards.
- **Hygiene Measures:** Strict adherence to hygiene protocols to prevent contamination.
- **Packaging Lines:** Milk is packaged into various sizes and types (e.g., pouches, cartons) using automated packaging machines.

We reached Mysore Palace at 2.30 p.m. to understand the history of Karnataka, then we started to hotel empire for lunch at 3.45 p.m. After that we visited to Tippu gumbaz between 5.00 p.m. to 6.00 p.m. Departure to Bangalore at 6.15 p.m. We reached Bangalore around 9.15 pm.

The industrial visit to Nandini Milk Dairy provided valuable insights into the dairy industry's operations and challenges. It highlighted the importance of quality control, technological advancements, and sustainable practices in dairy processing. The experience was educational and enhanced our practical understanding of the concepts learned in the classroom. On the whole, the industrial visit was very fruitful as all the students got exposure to practical learning.
